Milestones:
M2: Registration, Login/Logout, About, and Form features - March 5
M3: Book Generation feature - March 19
M4: Preview and Download features - March 30
M5: Share feature - April 10

This week we are still fleshing out M3 Book Generation feature.

We can generate Books/Posts and save it to our db. We need to revise the schema to be able to save pictures.

This week we are able to view posts from our db, but some more work needs to be done to display the images/text that gets generated. Once we have that, that would basically be like the Preview feature in M4, and downloading it would likely be simple to implement as well.

Instructions Verifying the progress

1. Click on commits to verify files that have been changed

2. Add /all to the page to view the contents (localhost:5000/all)
